DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyazaki et al.

Miyazaki et al (US 5,691,506) disclose (Fig. 5, 6) a shield connection structure comprising:

- a conductive shield member (20) including
- a plate member (121);
- a connection portion (122) having a tubular shape (claim 2);
- a continuous (claim 3), integrally formed (claim 5) reinforcing rib, on a peripheral edge.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6-8, 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art..

With regard to claims 1-3,5, 6, 15-17 the admitted prior art (the current application, Fig. 4-6) discloses a shield connection structure comprising:

- a conductive shield member including
- a plate member (8);

Art Unit: 2833

a connection portion (11) having a tubular shape (claims 2, 15);

a continuous (claim 3), reinforcing rib (14) on a peripheral edge;

a shielded wire includes a braided wire (5) which is folded over exterior of the connection portion.

The admitted prior art does not disclose that the reinforcing rib and said shield member formed of a one piece member.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to manufacture said shield member and the reinforcing rib formed of a one piece member, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).

With regard to claims 7 and 8, the admitted prior art disclose a ring (12).

With regard to claims 14 and 18, the admitted prior art discloses the the reinforcing rib and said connection portion extend in opposite directions.

Response to Arguments

Applicant's arguments with respect to claims 1 and 6 have been considered but are moot in view of the new ground(s) of rejection.
